

SteelMac Crew Completes BOHS 402 & BOHS 405 Asbestos Training

5th - 9th October 2009

Following from a successful summer of training, SteelMac Ltd continues to strive towards offering the most competent and skilled workforce on the market. As such our crew was put through their paces over a 5 day course to achieve their BOHS 402 and BOHS 405 certificates.

BOHS P402 Building Surveys & Bulk Sampling proficiency module a recognised qualification required to undertake Asbestos surveys. The BOHS P402 provides the background and practical knowledge required for surveying buildings for asbestos and the taking of any bulk samples. The intensive course is aimed at equipping our workers with the necessary skills to undertake an asbestos survey based upon the procedures detailed in MDHS 100.

Following successful completion of this course SteelMac Ltd is now able to offer asbestos surveys, collect bulk samples for analysis, carry out a material assessment and produce information to assist the client in formulating an asbestos management plan.

At the same time, SteelMac Ltd undertook the BOHS P405 Management of Asbestos in Buildings module. This provides our crew with the practical knowledge and skills to be able to manage asbestos in buildings and a knowledge base to audit asbestos removal projects.

During this course several aspects were covered which allows the our crew to understand the following:

- The nature and types of asbestos, health risks etc.
- Legal requirements to protect those at risk from exposure to asbestos fibres.
- The uses of asbestos-containing materials in buildings and plant.
- Relevant health and safety and asbestos legislation.
- Asbestos removal procedures and techniques.
- Auditing and inspecting asbestos control and work methods.
- Role of the laboratory analyst.

(above) Under the excellent training from Nelson Howe (AAA Training) the SteelMac crew passed both certifications with flying colours
